

COOKED PLAYDOUGH FOR ONE CLASS

3 cups flour
1 1/2 cups salt
2t cream of tartar

3 cups water
1/4 cup + 2T or 3/8c oil
1 t. food coloring

Combine flour, salt and cream of tartar in a large saucepan. Gradually stir in water, oil, and food coloring. Cook over medium heat, stirring constantly until a ball forms. Remove from heat and knead until smooth. Store in an airtight container. Enjoy!

Salt Dough Recipe

This recipe is used to make dough to create the United States physical relief maps.

4 cups flour

1 cup salt

1 ½ cups water (Add a little at a time)

Mix ingredients well. Knead dough by hand until it is smooth and pliable. The mixture should be the same consistency of Play-Doh and should not be set or sticky. **Extra flour can be added if the dough gets too wet.** To color the dough, add food coloring. The food coloring seems to work best when added to a small amount of water and then worked into the dough. Store the dough in a Zip-Loc type bag or air tight plastic container.

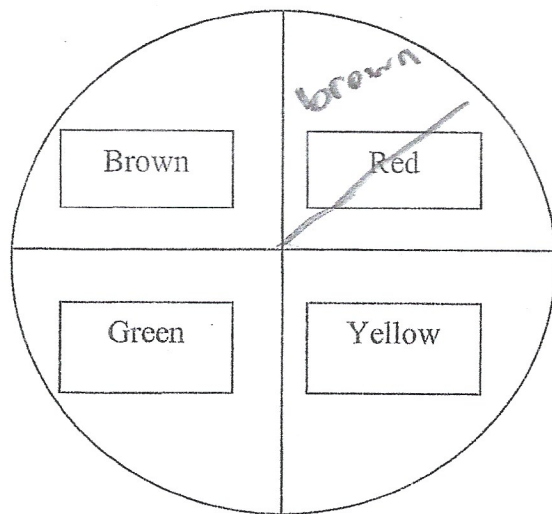

Please divide your batch of dough into the following colors and portions approximately:

¼ Yellow

¼ Green

¼ Red

¼ Brown

*To make brown, use 1 part green, 4 parts yellow, and 4 parts red. You may need to experiment a little. It's okay if the color is on the orange side.
